KWARA

STATE OF HARMONY

Kwara State was created on 27th May, 1967 as one of the first 12 States to replace the nation's four regions. Originally, the State was known as West Central State but the name was changed to Kwara, a local name from the Niger River. The size of the State has been reduced over the years, as new States have been created within the Federation. It is one of the 36 States that makes up the Federal Republic of Nigeria with a total land mass of 34,500 square kilometres. It shares boundary to the South-West with Ekiti, Osun and Oyo States.

Ilorin, the capital city is situated 306 km inland from the coastal city of Lagos and 500 km from the Federal Capital, Abuja. Major towns include: Offa, Omu-Aran, Jebba, Patigi. Erin-lle, llofa, Adeleke Igbewere, Ejidongari, Osi, Lafiagi, Gure, Afon, Kaiama, Isanlu-Isin, Egbejila, llota, Iponrin, Igbaja, Oke-Ode, Ajase-Ipo, Share, Oro, Oro-Ago and Ira. Kwara State is known as the State of Harmony on account of the peaceful relations that exist among its multicultural and diverse population of about 2.5 million people. Followers of the three great religious faiths to be found in

Nigeria, Islam, Christianity and Traditional coexist within the State.

Kwara State consists of sixteen Local Government Areas. They are: Asa, Baruten, Edu, Ekiti, Ifelodun, Ilorin East, Ilorin South, Ilorin West, Irepodun, Isin, Kaiama, Moro, Offa, OkeEro, Oyun and Pategi.

ECONOMY

Agriculture is the main source of the economy and the principal cash crops are: cotton, cocoa, coffee, Kolanut, tobacco, beniseed and palm produce. Mineral resources in the state are Petroleum, Gold, limestone, marble, feldspar, clay, kaolin, quartz and granite rocks.

EDUCATION

Kwara has a Federal University, the University of Ilorin, a state university, Kwara State University, two polytechnics, Kwara State Polytechnic and Federal Polytechnic Offa, six colleges: the College of Education, Ilorin, College of Education, Lafiagi, College of Education, Oro, School of Health Technology, Offa, Kwara State College of Nursing, Oké ode and College of Nursing, Ilorin. It is also home to Seven Private universities; Landmark University, Omu-Aran, Thomas Adewumi University, Oko-Irese, AhmanPategi University, Pategi, University of Offa, Offa, Crown Hill University, Eiyen'korin, Al Hikmah University, Ilorin and Summit University, Offa. There is also a navy school, Nigerian Navy School of Health Science Irra Road Offa and International Aviation College, Ilorin.

TOURISM

Important tourist attractions in Kwara State include Esie Museum, Owu waterfalls, Imoleboja Rock Shelter, Ogunjokoro, Agbonna Hill and Awon Mass Wedding in Shao. There is also Sobi Hill amongst others which is the largest landform in Ilorin, the State Capital.

INTRODUCTION

THE LEGAL FRAME WORK FOR THE AUDIT OF GOVERNMENT ACCOUNTS

The legal frame work under which the Auditor General performs his functions is quite robust. While the constitution of the country remains supreme extant law, there are numerous other legislations that empower him to conduct his audit. This include: The Kwara State Public Audit (Re- Enactment) Law, 2021 (Law No.8 of 2021, The Audit Act, 1956 (as amended), financial Control and Management Act, 1958 (as amended), Fiscal Responsibility Act, Financial Regulations, Financial Instructions, Financial and Administrative Circulars and other laws of the State House of Assembly as instruments of establishing specific organs or agencies for the conduct of government transactions have provisions which empower the Auditor General to carry out statutory audit functions.

The audit involved the performance of procedures, the selection of which depends on the Auditors' judgment to obtain audit evidence about the amounts and disclosures in the financial statements. Evaluation of the appropriateness of the accounting polices used and the reasonableness of the overall presentation of the financial statements was also conducted. I believe the audit has provided reasonable evidence and assurances sufficient and appropriate to provide a basis for my audit opinion.

I have therefore, certified the individual accounts maintained by Ministries, Departments and Agencies (MDAs) that they are in order, subjects to comments contained in this report while irregularities have been communicated through various letters, reports and queries to the respective Accounting Officers. And all unresolved issues are presented in this report.

CONSTITUTIONALITY

The provisions of section 125(2) of the constitution of the Federal Republic of Nigeria, 1999 (as amended), Section 7 (1) of Kwara State Public Audit (Re-Enactment) Law, 2021 (Law No.8 of 2021) provides for the audit of public accounts of state that "The public account of a state and of all offices and courts of the state shall be audited by the Auditor General for the state who shall submit

his report to the House of Assembly of the state concerned, and for that purpose. The Auditor-General or any person authorized by him in that behalf shall have access at all time to all the books, records, returns, and other documents relating to those accounts".

The provision of section 125(4) of the same constitution further provides that "The Auditor – General for the State shall have power to conduct periodic checks of all government statutory corporations, commissions, authorities, agencies including all persons and bodies established by law of the House of Assembly of the State".

PUBLIC ACCOUNTS COMMITTEE

TABLING OF PREVIOUS AUDIT REPORTS

Auditor General's reports for the financial year ended 31st December, 2020 and 2021 had been submitted to the Honourable House of Assembly. The two years reports have been deliberated upon and finalized between the public account committee (PAC) of Kwara State House of Assembly, Office of The State Auditor General and the affected Accounting officers of the MDAs.

This development has awakened all the Accounting officers and officers responsible for financial duties and obligations to conduct themselves in accordance with the established rules and regulations and other extant laws guiding the conduct of accounting operations.

At this juncture, I wish to express my profound gratitude to members of this very important committee and the entire members of Kwara State House of Assembly for standing up to their constitutional duties.

They have equally energized the office to face its responsibilities with confidence and courage.

SUBMISSION OF THE ACCOUNTANT GENERAL'S FINANCIAL STATEMENT

The draft annual accounts and Financial Statement of the Government of Kwara State for the accounting period covering 1stJanuary to 31stDecember, 2022

prepared by the State Accountant General's Office and Ministry of Finance was received by my office on **31**st **March, 2023**, after proper review and routine audit scrutiny, some observations were raised and it was reconciled and responded to accordingly. After reconciliation and responses, the amended copies were returned on **26**th **June, 2023** to me for certification. The schedule of the statement in appendix II CAP is attached to this report.

Acknowledgement

I wish to express my heartfelt gratitude and that of the entire staff of the Office of the State Auditor General to His Excellency Mallam Abdulrahman Abdulrazaq, the Executive Governor of Kwara State for giving me the opportunity to serve as the state Acting Auditor General and his positive disposition towards the Office, without which the processing and production of this report would not have come to fruition.

The office of the State Auditor General commends the efforts of the Kwara State House of Assembly and the State Governor for Passing and assenting to the Kwara State Public Audit Law, 2021 on 30th June, 2021. The law grants the Office of the Auditor General full autonomy in discharging its constitutional duties. It has gone in a long way in helping the state audit in performing their constitutional duties without fear or favour.

I wish to commend the Accountant General and his staff for being prompt in rendition of the Annual Financial Statements.

I wish to highly commend the commitment, selflessness, loyalty, and patriotism exhibited by the Treasury department audit Team. Worthy of recognition also is the contributions, hard work, and good spiritedness of all the members of staff of the Office of Auditor General.

Tiamiyu, Fatai Adeyemi, FCA, ACTI Kwara State Ag. Auditor General

30th June, 2023

<u>www.kwarastate.gov.ng</u> KWARA STATE GOVERNMENT 2022 REPORT OF THE AUDITOR-GENERAL

AUDITOR GENERAL'S CERTIFICATE

REPORT/CERTIFICATE OF THE STATE AUDITOR-GENERAL ON THE FINANCIAL STATEMENT OF KWARA STATE GOVERNMENT FOR THE YEAR ENDED 31ST DECEMBER, 2022

In accordance with the provision of Section 125(2) of the Constitution of the Federal Republic of Nigeria, 1999 (as Amended) and section 7(1) of the Kwara State Public Audit (Re- Enactment) Law, 2021 (Law No.8 of 2021). I have examined the Accounts and Financial Statements of the Government of Kwara State of Nigeria for the year ended 31stDecember, 2022.

Accountant General's Responsibility

The Accountant General of the State is responsible for:

- 1. Establishing and maintaining adequate system of internal control to provide adequate and reasonable assurance that the transaction reported are recorded accurately and are within statutory authority.
- 2. Ensuring the integrity and objectivity of the Financial Statement to reflect the financial position of the State as at 31stDecember, 2021.

The Accountant General further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of Financial Statement as well as adequate system of internal control.

Auditor-General's Responsibilities

The State Auditor General has the statutory responsibility to form an independent opinion based on the audit of the financial statements and to report thereon as provided in section 11(1) of the Kwara State Public Audit (Re- Enactment) Law, 2021 (Law No.8 of 2021).

Basis of Opinion

The audit was conducted in accordance with the Public Sector Auditing Standards, 1997, International Standards on Auditing and the International Standards of Supreme Audit Institutions (ISSA). During the audit, I evaluated the overall adequacy of the information presented in the General Purpose Financial Statements (GPFS), which were prepared in accordance with the International Public Sector Accounting Standards (IPSAS) Accrual Basis. I have obtained reasonable Information and explanations that to the best of my knowledge were relevant and necessary for the purposes of the audit, and serve as evidences and assurance which formed the basis of my independent opinion.

Opinion

In my opinion, the Financial Statements of the Kwara State Government for the year ended 31stDecember, 2022 comprising of the Statement of Financial Performance, Statement of Financial Position, Statement of Cash Flow, Statement of Changes in Net Assets/Equity and Notes to the Account, show a true and fair view of the State's financial performance, the cash flow and the financial position available as at that date. In my opinion the Kwara State Government has consistently complied with the extant guidelines and provision stipulated by the International Public Sector Accounting Standards (IPSAS) except for full consolidation of the Subsidiaries, Associates and Joint ventures as required by International Public Sector Accounting Standard is (IPSAS) 35; and delay in developing reliable model for recognizing and measuring assets and liabilities during the three (3) years transition period in the financial statement which commenced in the accounting Standards (IPSAS) 33 – First Time Adoption.

In view of the above, the Kwara State Government is not able to make an explicit statement of its full compliance with Accrual basis IPSASS in preparing its transitional IPSAS financial Statement for the year ended 31stDecember, 2022.

Special Opinion

The State is eligible to receive grant financing from the Federal Government subject to performance against predefined criteria in the World Bank assisted States Fiscal Transparency, Accountability and Sustainability Program for Results (SFTAS PforR). The receipts and Expenditure framework are detailed in the Disclosure Notes attached to the General-Purpose Financial Statements (GPFS) of Kwara State Government. In all material respects, the expenditure incurred and the fund received against the SFTAS program by the state for the year ended 31st December, 2022 are in accordance with International Public Sector Accounting Standard (IPSAS).

Tiamiyu, Fatai Adeyemi, FCA, ACTI Kwara State Ag. Auditor General 09/06/2023.

AUDITOR GENERAL'S REPORT ON THE DISCLOSURE NOTE ON COVID-19 RESPONSE EXPENDITURES FOR THE YEAR ENDED 31ST DECEMBER, 2022

The state Fiscal Transparences, Accountability and sustainability (SFTAS) initiative is a World Bank Assisted Programme of Nigeria Governor's Forum with the aim of promoting transparency, accountability and sustainability in public governance. A special feature which characterized year 2022 financial statement derives from SFTAS Disbursement linked result (DLR 13.3) directive which stipulate the need to have specific disclosures (by way of note to the account) on the execution of Covid-19 responses tagged expenditure; Recurrent and Capital Expenditures of key Ministries, Department and Agencies in the state.

In line with DLR 13.3 of SFATS requirement, that stipulates execution of at least 90% of the tagged Covid-19 response expenditures in the approved FY 2022 state budget. The Kwara State Government approved the sum of ₦341,750,000.00 and ₦6,070,193,496.00 for Covid-19 tagged Recurrent and Capital Expenditures respectively, while the sum of ₦337,189,800.02 and ₦2,610,379,158.97 were expended for Covid-19 tagged Recurrent and Capital Expenditures respectively. This represents 98% and 43% FY 2022 budget performance on Recurrent and Capital Expenditures respectively.

The state was able to access the COVID-19 Action Recovery and Economic Stimulus (CARES) WB for the year 2022 while the State was unable to access the FGN COVID-19 Intervention Facility from the Federal Government for the financial year ended 31st December, 2022.

In compliance thereof with the SFTAS requirements, in our opinion, the Accountant General Disclosure note on Covid-19 response activities reflects that the State Government performed above 90% threshold requirement of DLI 13.3 of SFTAS on Recurrent expenditure and above average performance on Capital Expenditure across the Administrative, Economic and Social sectors of the state economy to mitigate and curtail the effect of Covid-19 pandemic.

Tiamiyu, Fatai Adeyemi, FCA, ACTI Kwara State Ag. Auditor General 09/06/2023.

OFFICE OF THE KWARA STATE ACCOUNTANT GENERAL KWARA STATE GOVERNMENT

RESPONSIBILITY FOR FINANCIAL STATEMENTS

These Financial Statements have been prepared in accordance with the provisions of the Finance (Control and management) Act cap 144 LFN of 1958 as amended. The Financial Statements comply with the Generally Accepted Accounting Practice (GAAP) and prepared in accordance with the International Public Sector Accounting Standards (IPSAS) accrual basis.

To fulfill accounting and reporting responsibilities, I as the Accountant General and the State's Accounting Officer for receipts and payments of Government, I am saddled with the responsibility for establishing and maintaining an adequate system of internal control designed to provide reasonable assurance that the transactions recorded are within statutory authority and properly recorded to prevent fraud and irregularities while resources are safeguarded.

The responsibility for the preparation of the Financial Statements rests solely with the Office of the Accountant General and as such efforts were made to ensure that these Financial Statements fairly reflect the financial position of Kwara State Government as at 31st December, 2022 and its operations for the year ended on that date.

These Financial Statements are prepared in accordance with IPSAS Accrual basis. However, by virtue of IPSAS 33 (First Time Adoption of Accrual Basis IPSAS) Kwara State Government is allowed a period of three (3) years from the year of commencement which is 2020 to year 2022 to adopt the exemptions in-respect of its yet – to – be re-valued Assets. It is worthy of note that these Financial Statements is in the last year of the three years transitional relief period of IPSAS 33 (First Time Adoption of Accrual Basis IPSAS) therefore, the transitional exemption still applies.

The Accountant General Accepts responsibility for the integrity and objectivity of the Financial Statements and the information contained therein.

31/03/2023

AbdulGaniyu Sani FNIM, FCA, FCNA, ACTI FRC/2016/ICAN/00000015302 Accountant General, Kwara State.

Ahmadu Bello Way, GRA, P.M.B. 1382, Ilorin Telegram: GOV. ILORIN

www.kwarastate.gov.ng

We accept responsibility for the integrity of these Financial Statements, the information they contain and their compliance with the Finance (Control and Management) Act cap 144 LFN of 1958 as amended.

In our opinion, these Financial Statements fairly reflect the financial position of Kwara State Government of Nigeria as at 31st December, 2022 and its operations for the year ended on that date.

AbdulGaniyu Sani FNIM, FCA, FCNA, ACTI FRC/2016/ICAN/00000015302 Accountant General, Kwara State.

APPRAISAL OF BUDGET PERFORMANCE

TOTAL REVENUE FUND 2022

The provision of section 120 of the constitution of Federal Republic of Nigeria 1999 (as amended) provides that all revenue received by the State Government except those specifically provided to be treated otherwise are to be credited to the Consolidated Revenue Fund of the State.

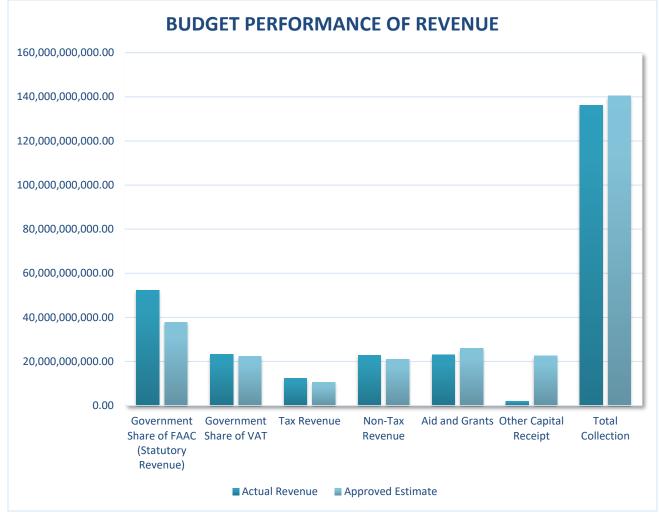

For the fiscal year ended 31^{st} December, 2022; the Government of Kwara State approved a projected Total revenue budget of \$154,080,168,762.00 as against \$149,962,333,086.00 budgeted for the previous year (2021). The figure above indicates an increase of \$4,117,835,676.00 or 2.75% above that of the year 2021.

The total revenue budget for the year 2022 amounted to ₦154,080,168,762.00 which consist of Government share of FAAC (Statutory Revenue), Government Share of VAT, Tax Revenue, Non-Tax Revenue and others as against the revenue figure of ₦149,962,333,086.00 covering the same period for the year 2021. The total revenue for the year 2022 is indicated in the table below:

Revenue	Notes	Actual Revenue	Approved Estimates	Variance	Performance
Government Share of FAAC (Statutory Revenue)	1	52,397,380,165.82	37,853,942,589.00	14,543,437,576.82	138.4%

STATEMENT OF CASH FLOW (CASH BALANCES)

The cash balances are made up of various cash book balances maintained by the main Expenditure control section of Accountant General's Office. These comprises of cash in bank, deposit held with banks and time deposit (cash and cash equivalent) amounting to \$19,703,007,934.15 have been reconciled with the banks statements as at 31^{st} December, 2022.

INVESTMENT

The state Government investment as at January 1st 2022 was \aleph 490,369,201.55. There was no acquisition of investment during the year through the ministry of finance incorporated leaving a balance of \aleph 490,369,201.55 as at 31st December, 2022. The State government values of these investments are stated at acquisition price. During the year under review 2022, no quoted companies' shares were sold.

IPSAS IMPLEMENTATION IN KWARA STATE

The Kwara State Government has adopted the Accrual Basis of International Public Sector Accounting Standards (IPSASs) and as a result the Financial Statements have been prepared in accordance with the Accrual Basis IPSASs. The implementation of Accrual Basis of IPSAS Accounting in Kwara State commenced on 1st January, 2020 and therefore the current year 2023 Audited Financial Statements is the third in the series. The IPSAS standards require a full consolidation of all Government Ministries, Departments, Agencies (MDAs) and Parastatal Organizations; however, the consolidation of the Subsidiaries, Associates and Joint ventures of the State Government has not yet occurred and as such, the figures contained in these financial statements presented by the Accountant General were yet to fully reflect all the activities of the State Government. It is therefore, important for the State Government to have holistic view of its financial performance and position; hence consolidation of all accounts would provide the information and window to allow for adequate assessments thereof.

As at date, the under-listed classes of Assets have not been recognized, measured and reported in the year 2022 accrual IPSAS based Kwara State Government Financial Statements:

- Infrastructural Assets
- Land building
- Plant and Machinery
- Furniture and Fittings
- Motor Vehicles
- Medical and Laboratory Equipment
- Library Books
- Computer and Office Equipment
- Leasehold Plants
- Tourism (Stadia)
- Agricultural Lands
- Intangible Assets (Information, Communication and Technology)
- Parks and Gardens

- Specialized Equipment (such as Fire Fighting Equipment, Oxygen Tank, Survey & Precision Equipment, Waste Disposal Trucks etc.)
- Other classes of Assets namely investment Property, Heritage Assets, Biological Assets and Concession Assets (where applicable).

Thus, it is necessary to state that the following items were observably not recognized in the year 2022 Financial Statements:

- Full consolidation of Subsidiaries, Associates and Joint Ventures of the State;
- Related parties' disclosure.
- Revaluation of Non-current asset.

SFTAS GUIDELINES AND EFFECT ON THE STATE AUDITED FINANCIAL STATEMENTS

The State's Fiscal Transparency, Accountability and Sustainability (SFTAS) initiative is a World Bank Assisted Programme of the Nigeria Governor's Forum with the aim to promote transparency, accountability and sustainability in public governance. A special feature which characterized year 2022 Financial Statements derived from the SFTAS directive which stipulates the need to have specific disclosures (by way of notes to the accounts) on the Recurrent Expenditure (Personnel Cost and Overhead Cost) of four (4) key Ministries and Agencies in the State namely:

- 1. Ministry of Finance,
- 2. Ministry of Planning and Economic Development,
- 3. Kwara State Internal Revenue Service and
- 4. Office of the Accountant General;

And requirement of the Auditor-General to give specific audit opinion on the transactions of the above named four (4) MDAs.

In compliance thereof with the SFTAS requirements, pages 6 and disclosure notes of this report convey the audit opinion and disclosure note in respect of the affected four (4) MDAs.

COVID-19 RESPONSE ACTIVITIES AND EFFECT ON THE STATE AUDITED FINANCIAL STATEMENTS

The state Fiscal Transparences, Accountability and sustainability (SFTAS) initiative is a World Bank Assisted Programme of Nigeria Governor's Forum with the aim of promoting transparency, accountability and sustainability in public governance. A special feature which characterized year 2022 financial statement derives from SFTAS Disbursement linked result (DLR 13.3) directive which stipulate the need to have specific disclosures (by way of note to the account) on the execution of Covid-19 responses tagged expenditure; Recurrent and Capital Expenditures of key Ministries, Department and Agencies in the state.

In line with DLR 13.3 of SFATS requirement, that stipulates execution of at least 90% of the tagged Covid-19 response expenditures in the approved FY 2022 state budget. The Kwara State Government approved the sum of ₦341,750,000.00 and ₦6,070,193,496.00 for Covid-19 tagged Recurrent and Capital Expenditures respectively while the sum of ₦337,189,800.02 and ₦2,610,379,158.97 were expended for Covid-19 tagged Recurrent and Capital Expenditures respectively. This represents 98% and 43% FY 2022 budget performance on Recurrent and Capital Expenditures respectively.

The state was able to access the sum of Nine Hundred Million Naira (N900,000,000.00) for the COVID-19 Action Recovery and Economic Stimulus (CARES) WB for the year 2022 while the State was unable to access the FGN COVID-19 Intervention Facility from the Federal Government for the financial year ended 31st December, 2022.

In compliance thereof with the SFTAS requirements, in our opinion, the Accountant General Disclosure note on Covid-19 response activities reflects that the State Government performed above 90% threshold requirement of DLI 13.3 of SFTAS on Re-current expenditure and above average performance on Capital Expenditure across the Administrative, Economic and Social sectors of the state economy to mitigate and curtail the effect of Covid-19 pandemic.

GENERAL OBSERVATIONS

MINISTERIAL DVEA BOOKS

It was observed that financial data used for the preparation of Statement of Financial Performance, Statement of Changes in Net Assets/Equity, Statement of Cash flow, Statement of Financial Position and Notes to the Account was extracted from Ministerial Financial Records. The error, lapses and irregularities noted in the Ministerial accounts have been brought to the notice of the concerned MDA'S Accounting Officers; their reaction has been received and follow up action continues as at the time of writing this report in the year 2022.

IPSAS IMPLEMENTATION

The attention of the Kwara State office of the Accountant General was drawn to the provision of International Public Sector Accounting Standard (IPSAS 33 - First Time Adoption) that grants transitional exemptions to entities adopting accrual basis for the first time, providing a major tool to help entities along their journey to implement IPSASs. It allows first-time adopters three (3) years to recognize specified assets and liabilities. This provision allows sufficient time to develop reliable models for recognizing and measuring assets and liabilities during the transitional period.

The (3-year) transition periods for the revaluation of the entire State owned Asset and Liabilities for immediate inclusion and adjustments in the financial statements commence in the year 2020 and deemed expired this accounting year ended December, 2022. Hence the need to brace up for the full compliance with Accrual basis IPSAS in preparing its Accrual base IPSAS Financial Statement from next year ended 31st December, 2023.

Worthy of note is that the IPSAS standards require a full consolidation of all Government Ministries, Departments, Agencies (MDAs) and Parastatal and Corporations;

Therefore all the under-listed classes of Assets must be recognized, measured and reported in the year 2023 accrual IPSAS Kwara State Government Financial Statements:

- Infrastructural Assets
- Land building
- Plant and Machinery
- Furniture and Fittings
- Motor Vehicles
- Medical and Laboratory Equipment
- Library Books
- Computer and Office Equipment
- Leasehold Plants
- Tourism (Stadia)
- Agricultural Lands
- Intangible Assets (Information, Communication and Technology)
- Parks and Gardens
- Specialized Equipment (such as Fire Fighting Equipment, Oxygen Tank, Survey & Precision Equipment, Waste Disposal Trucks etc.)
- Other classes of Assets namely investment Property, Heritage Assets, Biological Assets and Concession Assets (where applicable).

In addition, it is necessary to state that the following items must recognize in the year 2023 Financial Statements:

- Full consolidation of Subsidiaries, Associates and Joint Ventures of the State;
- Related parties' disclosure. If any.

ASSET REVALUATION

The review of the Kwara State Government accounts and records revealed that the assets and liabilities of the Government is yet to be revalued in line with the provisions of the International Public Sector Accounting Standard (IPSAS) Accrual Basis of accounting.

The attention of the government was drawn to the effect of the delay in developing reliable model for recognizing and measuring assets and liabilities during the three years transition period in the financial statement which commenced in the accounting year ended 31st December, 2020 and had expired this accounting year ended 31st December, 2022. Hence the need to brace up for the full compliance with Accrual basis IPSAS in preparing its Accrual base IPSAS Financial Statement from next year ended 31st December, 2023 as required by International Public Sector Accounting Standards (IPSAS) 33 – First Time Adoption.

In view of the above, the Kwara State Government is not able to make an explicit statement of its full compliance with Accrual basis IPSASS in preparing its transitional IPSAS financial Statement for the year ended 31stDecember, 2022.

CONTRACTS AND CONTRACTOR'S DOCUMENTATION

The review of the ministerial records and accounts through which capital projects were executed in the year ended 31st December, 2022 revealed a substantial and tremendous improvement in records keeping and contractor compliance in submission of the required and prerequisite document which a contractor is expected to possess and make available before qualifying to bid for any contract as prescribed by the Public Procurement act, 2007 and the Kwara State Public Procurement Law, 2018 as amended.

DIRECT LABOUR:

The review of capital projects records and documents revealed that a significant numbers of capital projects in the year under review were executed through direct labour model with the exemption of project finance through Government bond. <u>www.kwarastate.gov.ng</u> KWARA STATE GOVERNMENT 2022 REPORT OF THE AUDITOR-GENERAL

The attention of the all Ministries, Department and Agencies (MDAs) through which capital projects were executed was drawn to the provisions of section 42 (1-a-c), (2-a-c); section 43 (1) a-c and 43 (2, and 4) and section of the Public procurement Act, 2007, section 58 (1, 2, 3); section 59 (1) a-b and 59 (2) of Kwara state Public Procurement (amendment) Law, 2020 and section 19 (32-33) (force account) Procurement procedures manual for public procurement in Nigeria bureau of public procurement (BPP) second edition January 2011; on the execution of project using direct labour model, the benefit and possible risk.

SUPPORTING DOCUMENTS LAPSES

We equally observed that some payment vouchers lack essential supporting documents such as receipt and LPO. Etc. while some ministry attached an unsatisfactory and unacceptable receipt. Some vouchers were also not supported with schedule of payment while some payment vouchers made for the procurement of store items were not taken on charged (SRV) in line with sections 603, 2401, 2406 and 2602 of the financial regulation respectively.

The attention of the Accounting officers of the concerned MDAs has been drawn to the observations, follow up action continues.

RECOMMENDATIONS

ASSET REVALUATION

International Public Sector Accounting Standard (IPSAS33 - First Time Adoption) grants transitional exemptions to entities adopting accrual basis for the first time, providing a major tool to help entities along their journey to implement IPSASs. It allows first-time adopters three (3) years to recognize specified assets and liabilities. This provision allows sufficient time to develop reliable models for recognizing and measuring assets and liabilities during the transitional period.

The Kwara State Government through the office of the State Accountant General commenced the adoption of IPSASs Accrual Basis of accounting in the preparation and presentation of financial statements since the year 2020.

In line with IPSAS 33, the three year transition has lapses this accounting year ended 31st December, 2022. We wish to reiterate the need for the state government through the office of the Accountant General to revalue the entire State owned Asset and Liabilities for immediate inclusion and adjustments in the financial statements from the beginning of the expiration of 3-year transition period 1st of January 2023 and full disclosure in the fiscal year ended 31st December, 2023.

DIRECT LABOUR

Apart from projects financed through Government Bond, significant numbers of capital projects carried-out in Ministries, Department and Agencies (MDAs) in the year ended 31st December, 2022 were executed through direct labour model. Sequel to the loophole created by the Kwara State Public procurement (Amendment) Law, 2020 on the use of direct contracting for procurements and contracts, the Kwara State Government through the Kwara State House of Assembly is advised to amend the Kwara State Public Procurement (Amendment) Law, 2020 to include modalities for direct labour and its threshold.

DOCUMENTATION OF PAYMENT VOUCHERS AT THE MDA'S

The Office of the Accountant General is advised to direct all the Controllers of Finance and Account (CFAs) in all Ministries, Departments and Agencies to maintain a soft copy of the Cash Book, DVEA Book, and Payment Register.

CONTRACT DOCUMENTATION

The Office of the Accountant General is advised to ensure that the affected Ministries, Departments, and Agencies (MDA's) contract and contractor files contain all necessary documents as prescribed by the Kwara State Public Procurement Agency. This will ensure that proper and adequate contract files are maintained by the MDA's to strengthen probity and accountability.

CAPACITY BUILDING

Adequate incentives, training and retraining of the staff should be provided to the staff as and when due.

INTERNAL CONTROL SYSTEM

The existing internal control system in the Office of the State Accountant General is very encouraging; this should however be strengthened and straighten by the management to ensure judicious use of public fund.

Note: These observations noted do not have any significant effect on the financial statement presented.

GENERAL

PROGRESS OF WORK

The main Accounts and Sub-treasury Headquarters had been audited up to 31st December, 2022. The Ministries, Departments and Agency's (MDA's) accounts and records are being examined on a continuous basis.

STAFF STRENGTH

The office of the State Auditor General in the year 2022 had staff strength of One Hundred and Sixty-One (161) employees. During the year all deserving members of staff sat for promotion examination and were promoted.

TRAINING

Paucity of fund was the main reason why in-House training could not be conducted for the staff in the year under review. However, professional Office staff members of Institute of Chartered Accountant of Nigeria (ICAN), Association of Nigeria National Accountant (ANNAN) and Chartered Institute of Taxation of Nigeria (CITN) were mobilized for their annual mandatory continuous professional training (MCPDE).

MOTOR VEHICLE

The office has only two (2) pool vehicles for its operations running over Ten (10) years which is ageing and grossly inadequate, and it affects the effectiveness and efficiency in the discharge of the functions of the office. The office is in dire need of new pool vehicles for effective and efficient discharge of its constitutional duties.

OFFICE FURNITURE

We also hope that necessary furniture and fittings will be provided for effective functioning of the office.

INTERNET SERVICE

For the smooth operation of the office we equally hope that an uninterrupted internet service will be installed in the office of the kwara state Auditor General for quality service delivery.

DISCLOSURE NOTE FOR COVID-19 RESPONSE ACTIVITIES ON RECURRENT AND CAPITAL EXPENDITURES FOR THE YEAR 2022

BREAKDOWN OF BUDGETORY PROVISION AND ACTUAL EXPENDITURES FOR COVID-19 RESPONSE

To mitigate against the effect of the COVID-19 pandemic, the State makes provision in her amended budget for COVID-19 responsive Recurrent and Capital Expenditures for year 2022 as follows:

S/No.	Expenditures	Approved Budget 2022	Revised Budget 2022
1.	Recurrent Expenditure	450,000,000.00	341,750,000.00
2.	Capital Expenditure	6,570,193,496.00	6,070,193,496.00
	Total	7,020,193,496.00	6,411,943,496.00

Actual Expenditures incurred for Covid-19 during the financial year 2022 are:

S/No.	Expenditure	Actual Expenditure 2022	Approved Budget 2022	Revised Budget 2022
1.	Recurrent Expenditure	337,189,800.02	450,000,000.00	341,750,000.00
2.	Capital Expenditure	2,610,379,158.97	6,570,193,496.00	6,070,193,496.00
	Total	2,947,568,958.99	7,020,193,496.00	6,411,943,496.00

This is further broken down to sectors as follows:

S/No.	DETAIL	Actual Expenditure 2022	Approved Budget 2022	Revised Budget 2022
1.	RECURRENT EXPENDITURE			
	Administrative Sector	291,000,000.02	250,000,000.00	291,750,000.00
	Social Sector	46,189,800.00	200,000,000.00	50,000,000.00
	Total	337,189,800.02	450,000,000.00	341,750,000.00
2.	CAPITAL EXPENDITURE			
	Economic Sector	2,399,878,362.59	4,450,000,000.00	4,450,000,000.00

AbdulGaniyu Sani FNIM, FCA, FCNA, ACTI FRC/2016/ICAN/00000015302 Accountant General, Kwara State

NOTES TO THE FINANCIAL STATEMENTS SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. General information

Kwara State – a local name derived from the Niger River. The State of Harmony as it is fondly called on account of the peaceful relations that exists among its multicultural and diverse population of over 2.5 million people. Kwara State's peaceful population, abundant natural resources, well-developed infrastructure and proactive investment-attraction policies have made it an attractive destination for investors. Kwara State Government (KWSG's) principal activities are the provision of social, infrastructure, educational, housing, justice, transport, agricultural, health, emergency and waste management services among many others. The State's registered office is located at Ahmadu Bello Way, GRA Ilorin, Nigeria.

2.1 Statement of compliance with IPSAS and transitional explanations

The need for the development of unified accounting standards all over the globe and the quest to know the extent of IPSAS adoption and implementation in Nigeria necessitated this study. Commercial organizations all over the world are adopting International Financial Reporting Standards (IFRS), and governments are implementing International Public Sector Accounting Standards (IPSAS). With the exception of Government Business Enterprises, public sector accounting is governed by international Public Sector Accounting Standards. In response to demands for greater government financial accountability and transparency, IPSAS is currently at the center of a global movement in government accounting. The Federal Executive Council of Nigeria authorized its adoption in July 2010 and it became fully adopted in January 2016, but each of Nigeria's 36 independent states was required to decide its own implementation date. As a result, the Federation Account Allocation Committee (FAAC) formed a sub-committee in June 2011 to develop a roadmap for IPSAS adoption in the three tiers of government. Conclusively, it was noted that the implementation is aimed at strengthening the Country's accounting and financial reporting framework in consonance with global standards.

The financial statements have been prepared in accordance with accrual basis International Public Sector Accounting Standards (IPSASs). IPSAS 33 (First Time Adoption of Accrual Basis IPSAS) allows Kwara State Government a period of up to three years to recognize and/or measure certain assets and/or liabilities. The Government views the exercise of identifying and measuring legacy assets as very strategic. Hence Kwara State Government has chosen to be diligent in its approach and consequently require more time to fully accomplish the exercise. Based on the progress made so far, it is expected that the exercise would be concluded shortly.

In its transition to accrual basis IPSASs, Kwara State Government took advantage of this transitional exemption for its yet-to-be-valued and yet-to-be-recognized assets and liabilities. Coordinated efforts are currently being made to establish fair value assessment of all immovable assets controlled by the State. This is to be achieved, in part, through the constitution of a technical committee of relevant and experienced professionals from the Ministry of Works and other Infrastructure related MDAs.

As a result of the foregoing, Kwara State Government is unable to make an explicit and unreserved statement of compliance with accrual basis IPSAS in preparing its transitional IPSAS financial statements for this reporting period.

The State financial statements are presented in Nigerian Naira, which is the functional and reporting currency and all values are rounded to the nearest thousand except where the thousand sign (N'000) is not indicated. The accounting policies have been consistently applied to all the years presented.

The State financial statements are prepared on an accrual basis, except for the historical Plant, Property and Equipment (PPE) which efforts are currently being made to establish fair value of all assets controlled by the state.

2.2 Summary of significant accounting policies

a) Consolidation

Controlled entities

The controlled entities are all those entities over which Kwara State Government has the power to govern their financial and operating policies. The entities are all under Harmony Holdings Limited (State investment & Property Investment Company, Kwara State Transport). These controlled entities are fully consolidated from the date in which control is secured by Kwara State Government. They are de-consolidated from the date that control ceases. Inter-state transactions, balances and unrealized gains and losses on transactions between members of the State are eliminated in full. The accounting policies of the controlled entities are consistent with the policies adopted by Kwara State Government.

b) Interest in joint venture and associates

Where the State has an interest in a joint venture whereby the venturers have a binding arrangement that establishes joint control over the economic activities of the entity, the State realizes its interest in the joint venture using the equity method of consolidation. Under the equity method, on initial recognition the investment in an associate or a joint venture is realized at cost and the carrying amount is increased or decreased to recognize the investor's share of the surplus or deficit of the investee after the date of acquisition. The investor's share of the investee's surplus or deficit is recognized in the investor's surplus or

deficit. Distributions received from an investee reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the investor's proportionate interest in the investee arising from changes in the investee's equity that have not been recognized in the investee's surplus or deficit. Such changes include those arising from the revaluation of property, plant and equipment and from foreign exchange translation differences. The investor's share of those changes is realized in net assets/equity of the investor.

Kwara State Government has neither associates nor joint ventures as at 31st December, 2022.

c) Revenue recognition

Revenue from non-exchange transactions Fees, taxes and fines

The State recognizes revenues from fees, taxes and fines when the event occurs, and the asset recognition criteria are met. To the extent that there is a related condition attached that would give rise to a liability to repay the amount, deferred income is realized instead of revenue. Other non-exchange revenues are recognized when it is probable that the future economic benefits or service potential associated with the asset will flow to the state and the fair value of the asset can be measured accurately.

Control of an asset: This arises when the state can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one state receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another state in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by public sector entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting entity.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The **taxable event** is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to public sector entities, in accordance with laws and or regulations, established to provide revenue to the government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

d) Current versus non-current classification

Kwara State Government presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or

• There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. The State classifies all other liabilities as non-current.

e) Property, Plant and Equipment

Kwara State government is currently making effort to determine the cost of their PPE assets as at the date of adoption of IPSAS. Kwara state government would be recognizing its PPE on a class-by-class basis. This is to be achieved, in part, through the constitution of a technical committee of relevant and experienced professionals from the Ministry of Works and other Infrastructure related MDAs.

However, some assets procure by the state during the 2022 financial period were capture and registered.

All property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses. Historical Cost includes expenditure that is directly attributable to the acquisition and construction of the assets. When significant parts of property, plant and equipment are required to be replaced at intervals, the State recognizes such parts as individual assets with specific useful lives and depreciates them accordingly. Likewise, when a major overhaul is performed or any significant repair or maintenance, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in surplus or deficit as incurred. Where an asset is acquired in a non-exchange transaction for nil or nominal consideration the asset is initially measured at its fair value.

Finance cost attributable to amounts borrowed by Kwara state government to fund the acquisition of any property plant and equipment are expensed immediately they are incurred.

Depreciation is charged systematically over the asset's useful life. The depreciation method must reflect the pattern in which the asset's future economic benefits or service potential is expected to be consumed by the entity. The residual value must be reviewed at least annually and shall equal the amount the entity would receive currently if the asset were already of the age and condition expected at the end of its useful life. If operation of an item of property, plant and equipment (for example, an aircraft) requires regular major inspections, when each major inspection is performed, its cost is recognized in the carrying amount of the asset as a replacement, if the recognition criteria are satisfied. If expectations differ from previous estimates, the change must be accounted for as a change in an accounting estimate in accordance with IPSAS 3.

Assets under construction are not depreciated as these assets are not in use, Land and buildings are separable assets and are accounted for separately, even when they are acquired together. Land normally has an unlimited useful life, and therefore is not depreciated. All other asset classes are depreciated and depreciation on assets is charged on a straight-line basis over the useful life of the asset. Depreciation is charged at rates calculated to allocate the cost or valuation of the asset less any estimated residual value over its remaining useful life:

Buildings	45 - 55 years
Infrastructure assets	20 – 22 years
Plant & Machinery	5 - 12 years
Furniture & Fittings	5 - 7 years
Vehicles	5 – 7 years
Office & Other Equipment	4 – 5 years

The assets' residual values and useful lives are reviewed, and adjusted prospectively, if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount, or recoverable service amount, if the asset's carrying amount is greater than its estimated recoverable amount or recoverable service amount.

The State derecognizes items of property, plant and equipment and/or any significant part of an asset upon disposal or when no future economic benefits or service potential is expected from its continuing use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the surplus or deficit when the asset is derecognized.

f) Investment property

There are several circumstances in which public sector entities may hold property to earn rental and for capital appreciation. Other public sector entities may also hold property for rentals or capital appreciation and use the cash generated to finance their other (service delivery) activities. For example, a university or local government may own a building for the purpose of leasing on a commercial basis to external parties to generate funds, rather than to produce or supply goods and services. This property would also meet the definition of investment property.

Investment property is held to earn rentals or for capital appreciation or both. Therefore, investment property generates cash flows largely independently of the other assets held by an entity. This distinguishes investment property from other land or buildings controlled by public sector entities, including owner-occupied property. The production or supply of goods or services (or the use of property for administrative purposes) can also generate cash flows. For example, public sector entities may use a building to provide goods and services to recipients in return for full or partial cost recovery. However, the building is held to facilitate the production of goods and services and the cash flows are attributable not merely to the building, but also to other assets used in the production or supply process.

International Public Sector Accounting Standard IPSAS17 Property, Plant and Equipment applies to owner-occupied property.

Investment properties are measured initially at cost, including transaction costs. The carrying amount includes the replacement cost of components of an existing investment property at the time the cost is incurred if the recognition criteria are met and excludes the costs of day- to-day maintenance of an investment property. Investment properties primary comprise irrigation assets and other rental yielding buildings.

Investment property acquired through a non-exchange transaction is measured at its fair value at the date of acquisition. After initial recognition, investment properties are measured using the cost model and are depreciated over a 40-year period.

Investment properties are derecognized either when they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit or service potential is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in the surplus or deficit in the period of derecognition.

Transfers are made to or from investment property only when there is a change in use.

g) Leases

State as a lessee

Finance leases are leases that transfer substantially all of the risks and benefits incidental to ownership of the leased item to the State. Assets held under a finance lease are capitalized at the commencement of the lease at the fair value of the leased property or, if lower, at the present value.

of the future minimum lease payments. The State also recognizes the associated lease liability at the inception of the lease. The liability recognized is measured as the present value of the future minimum lease payments at initial recognition.

Subsequent to initial recognition, lease payments are allocated between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized as finance costs in surplus or deficit.

An asset held under a finance lease is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the State will obtain ownership of the asset by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating leases are leases that do not transfer substantially all the risks and benefits incidental to ownership of the leased item to the State. Operating lease payments are recognized as an operating expense in surplus or deficit on a straight-line basis over the lease term.

State as a lessor

Leases in which the State does not transfer substantially all the risks and benefits of ownership of an asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized over the lease term.

Rent received from an operating lease is recognized as income on a straight-line basis over the lease term. Contingent rents are recognized as revenue in the period in which they are earned.

h) Intangible assets

Intangible assets acquired separately are initially recognized at cost. The cost of intangible assets acquired in a non-exchange transaction is their fair value at the date of the exchange. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in surplus or deficit in the period in which the expenditure is incurred.

The useful life of the intangible assets is assessed as either finite or indefinite. Intangible assets with a finite life are amortized over its useful life:

Software 10 - 15 years

Intangible assets with a finite useful life are assessed for impairment whenever there is an indication that the asset may be impaired. Intangible assets with indefinite useful life are tested for impairment at least once year regardless of impairment indicators.

The amortization period and the amortization method, for an intangible asset with a finite useful life, are reviewed at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on an intangible asset with a finite life is recognized in surplus or deficit as the expense category that is consistent with the nature of the intangible asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the surplus or deficit when the asset is derecognized.

Research and development costs

The State expenses research costs as incurred. Development costs on an individual project are recognized as intangible assets when the State can demonstrate:

- The technical feasibility of completing the asset so that the asset will be available for use or sale
- Its intention to complete and its ability to use or sell the asset
- How the asset will generate future economic benefits or service potential
- The availability of resources to complete the asset
- The ability to measure accurately the expenditure during development

Following initial recognition of an asset, the asset is carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized over the period of expected future benefit. During the period of development, the asset is tested for impairment annually with any impairment losses recognized immediately in surplus or deficit.

i) Impairment of non-financial assets

Impairment of cash-generating assets

At each reporting date, the State assesses whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the State estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an assets or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets.

Where the carrying amount of an asset or the cash-generating unit (CGU) exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell,

recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

Impairment losses of continuing operations are recognized in the statement of financial performance in those expense categories consistent with the nature of the impaired asset.

Impairment of non-cash-generating assets

The State assesses at each reporting date whether there is an indication that a non-cashgenerating asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the State estimates the asset's recoverable service amount. An asset's recoverable service amount is the higher of the non-cash-generating asset's fair value less costs to sell and its value in use.

Where the carrying amount of an asset exceeds its recoverable service amount, the asset is considered impaired and is written down to its recoverable service amount.

In assessing value in use, the State has adopted the depreciation replacement cost approach. Under this approach, the present value of the remaining service potential of an asset is determined as the depreciated replacement cost of the asset. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

In determining fair value less costs to sell, the price of the assets in a binding agreement in an arm's length transaction, adjusted for incremental costs that would be directly attributed to the disposal of the asset is used. If there is no binding agreement, but the asset is traded on an active market, fair value less cost to sell is the asset's market price less cost of disposal. If there is no binding sale agreement or active market for an asset, the State determines fair value less cost to sell based on the best available information.

For each asset, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the State estimates the asset's recoverable service amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable service amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable service amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in surplus or deficit.

j) Financial instruments Financial assets

Initial recognition and measurement

Financial assets within the scope of IPSAS 29 Financial Instruments: Recognition and Measurement are classified as financial assets at fair value through surplus or deficit, loans and receivables, held-to-maturity investments or available-for-sale financial assets, as appropriate. The State determines the classification of its financial assets at initial recognition.

The State's financial assets include: cash and short-term deposits; trade and other receivables; loans and other receivables; quoted and unquoted financial instruments.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification.

Financial assets at fair value through surplus or deficit

Financial assets at fair value through surplus or deficit include financial assets held for trading and financial assets designated upon initial recognition at fair value through surplus and deficit. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets at fair value through surplus or deficit are carried in the statement of financial position at fair value with changes in fair value recognized in surplus or deficit. Kwara State Government does not have any 'financial assets at fair value through surplus or deficit' as at 31st DECEMBER 2022.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. Losses arising from impairment are recognized in the surplus or deficit. Kwara State Government does not have any 'loans and receivables' as at 31st DECEMBER 2022.

Held-to-maturity

Non-derivative financial assets with fixed or determinable payments and fixed maturities are classified as held to maturity when the State has the positive intention and ability to hold it to maturity. After initial measurement, held-to-maturity investments are measured at

amortized cost using the effective interest method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The losses arising from impairment are recognized in surplus or deficit. Kwara State Government does not have any 'held to maturity' as 31st DECEMBER 2022.

Available-for-sale financial assets

The State classifies available-for-sale financial assets as non-derivative financial assets that are designated as available for sale or are not classified as loans and receivables, held-to-maturity or financial assets at fair value through surplus or deficit.

After initial measurement, available-for-sale financial investments are subsequently measured at fair value with gains or losses recognized directly in net assets through the statement of changes in net assets until the financial asset is derecognized, at which time the cumulative gain or loss is recognized in surplus or deficit.

Derecognition

The State derecognizes a financial asset or, where applicable, a part of a financial asset or part of a group of similar financial assets when:

• The rights to receive cash flows from the asset have expired or is waived

• The State has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party; and either: (a) the State has transferred substantially all the risks and rewards of the asset; or (b) the State has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Impairment of financial assets

The State assesses at each reporting date whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be accurately estimated. Evidence of impairment may include the following indicators:

- The debtors or a group of debtors are experiencing significant financial difficulty
- Default or delinquency in interest or principal payments

• The probability that debtors will enter bankruptcy or other financial reorganization

• Observable data indicates a measurable decrease in estimated future cash flows (e.g., changes in arrears or economic conditions that correlate with defaults)

Financial assets carried at amortized cost

For financial assets carried at amortized cost, the State first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the State determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognized are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in surplus or deficit. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or transferred to the State. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is credited to finance costs in surplus or deficit.

Available-for-sale financial assets

For available-for-sale financial assets, the State assesses at each reporting date whether there is objective evidence that an investment or a group of investments is impaired.

In the case of financial assets classified as available-for-sale, objective evidence would include a significant or prolonged decline in the fair value of the investment below its cost. 'Significant' is evaluated against the original cost of the investment and 'prolonged' against the period in which the fair value was below its original cost. Where there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost

and the current fair value, less any impairment loss on that investment previously recognized in the surplus or deficit – is removed from the reserve in net assets and recognized in surplus or deficit.

In the case of debt instruments classified as available-for-sale, impairment is assessed based on the same criteria as financial assets carried at amortized cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortized cost and the current fair value, less any impairment loss on that investment previously recognized in surplus or deficit.

Financial liabilities

Initial recognition and measurement

Financial liabilities within the scope of IPSAS 29 are classified as financial liabilities at fair value through surplus or deficit or loans and borrowings, as appropriate. The State determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, plus directly attributable transaction costs. The State's financial liabilities include trade and other payables, bank overdrafts, loans and borrowings, financial guarantee contracts.

Subsequent measurement

The measurement of financial liabilities depends on their classification. Financial liabilities at fair value through surplus or deficit

Financial liabilities at fair value through surplus or deficit include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through surplus or deficit.

Financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term. This category includes derivative financial instruments entered into by the State that are not designated as hedging instruments in hedge relationships as defined by IPSAS 29.

Gains or losses on liabilities held for trading are recognized in surplus or deficit.

Loans and borrowing

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective interest method. Gains and losses are recognized in

surplus or deficit when the liabilities are derecognized as well as through the effective interest method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in surplus or deficit.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the State statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

Fair value of financial instruments

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs.

k) Cash and cash equivalents

Cash and cash equivalents comprise of cash on hand and cash at bank, deposits on call and highly liquid investments with an original maturity of three months or less, which are readily convertible to known amounts of cash and are subject to insignificant risk of changes in value. For the purpose of the State's statement of cash flows, cash and cash equivalents consist of cash and short-term deposits as defined above, net of outstanding bank overdrafts.

I) Inventories

Inventory is measured at cost upon initial acquisition. To the extent that inventory was received through non-exchange transactions (for no cost or for a nominal cost), the cost of the inventory is its fair value at the date of acquisition.

Costs incurred in bringing each product to its present location and condition are accounted for, as follows:

• Raw materials: purchase cost

• Finished goods and work in progress: cost of direct materials and labor and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs

After initial recognition, inventory is measured at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of operations, less the estimated costs of completion and the estimated costs necessary to make the sale, exchange, or distribution.

Inventories are recognized as an expense when deployed for utilization or consumption in the ordinary course of operations of the State.

m) Provisions

Provisions are recognized when the State has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Where the State expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognized as a separate asset only when the reimbursement is virtually certain.

The expense relating to any provision is presented in the statement of financial performance net of any reimbursement. The provisions primarily arise from ongoing litigations and from long-term environmental obligations for which there is present obligations, outflow is probable and reliable estimates could be made.

Restoration / Decommissioning liability

Decommissioning costs are provided at the present value of expected costs to settle the obligation using estimated cash flows and are recognized as part of the cost of that particular asset. The cash flows are discounted at a current pre-tax rate that reflects the

risks specific to the restoration/decommissioning liability. The unwinding of the discount is expensed as incurred and recognized in the statement of financial performance as a finance cost. The estimated future costs of decommissioning are reviewed annually and adjusted as appropriate. Changes in the estimated future costs or in the discount rate applied are added to or deducted from the cost of the asset.

Contingent liabilities

The State does not recognize a contingent liability, but discloses details of any contingencies in the notes to the financial statements, unless the possibility of an outflow of resources embodying economic benefits or service potential is remote.

Contingent assets

The State does not recognize a contingent asset, but discloses details of a probable asset whose existence is contingent on the occurrence or non- occurrence of one or more uncertain future events not wholly within the control of the State in the notes to the financial statements. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits or service potential will arise and the asset's value can be measured accurately, the asset and the related revenue are recognized in the financial statements of the period in which the change occurs.

n) Employee benefits Retirement benefit plans

The State provides retirement benefits for its employees and political officer holders.

Defined contribution plans are post-employment benefit plans under which an state pays fixed contributions into a separate entity (a fund), and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year in which they become payable.

Defined benefit plans are post-employment benefit plans other than defined-contribution plans. The defined-benefit funds are actuarially valued based on the projected unit credit method basis. Deficits identified are recovered through lump sum payments or increased future contributions on proportional basis. The contributions and lump sum payments reduce the post-employment benefit obligation.

Short and long-term employee benefits

Short-term employee benefits (payable within 12 months) shall be recognized as an expense in the period in which the employee renders the service. The cost of all short-term employee benefits, such as leave pay, is recognized during the period in which the employee renders the related service. The State recognizes the expected cost of performance bonuses only when the State has a present legal or constructive obligation to make such payment, and a reliable estimate can be made.

The State provides long-term incentives to eligible employees, payable on completion of years of employment. The State's liability is based on an actuarial valuation. The projected unit credit method has been used to value the obligation. Actuarial gains and losses on the long-term incentives are fully accounted for in the statement of financial performance.

o) Changes in accounting policies and estimates

Kwara state is currently required to make a change in accounting policy only if it is required by an IPSAS, or it results in reliable and more relevant information. If a change in accounting policy is required by an IPSAS, follow that pronouncement's transition requirements. If none are specified, or if the change is voluntary, Kwara state would apply the new accounting policy retrospectively by restating prior periods. If restatement is impracticable, include the cumulative effect of the change in net assets/equity. If the cumulative effect cannot be determined, Kwara state would apply the new policy prospectively.

Changes in accounting estimates (for example, change in useful life of an asset) are accounted for in the current period, or the current and future periods (no restatement). In the situation a distinction between a change in accounting policy and a change in accounting estimate is unclear, the change is treated as a change in an accounting estimate.

All material prior-period errors shall be corrected retrospectively in the first set of financial statements authorised for issue after their discovery, by restating comparative prior-period amounts or, if the error occurred before the earliest period presented, by restating the opening statement of financial position

p) Foreign currency transactions

Kwara state records using the spot exchange rate for initial recognition and measurement at the date of the transaction.

- At subsequent reporting dates, Kwara state uses:
- Closing rate for monetary items
- Transaction-date exchange rates for nonmonetary items carried at historical cost

• Valuation-date exchange rates for nonmonetary items that are carried at fair value

Exchange differences arising on settlement of monetary items and on translation of monetary items at a rate different from when initially recognized are included in surplus or deficit, with one exception: exchange differences arising from monetary items that form part of the reporting entity's net investment in a foreign operation are recognized in the consolidated financial statements that include the foreign operation in a separate component of net assets/equity; these differences will be recognized in the surplus or deficit on disposal of the net investment. The results and financial position of the states's foreign operations whose functional currency is not the currency of a hyperinflationary economy are translated into a different presentation currency using the following procedures:

- Assets and liabilities for each statement of financial position presented (including comparatives) are translated at the closing rate at the date of that statement of financial position.

- Revenue and expenses of each statement of financial performance (including comparatives) are translated at exchange rates at the dates of the transactions.

- All resulting exchange differences are recognized as a separate component of net assets/equity.

q) Related parties

The State regards a related party as a person or an state with the ability to exert control individually or jointly, or to exercise significant influence over the State, or vice versa. Members of key management are regarded as related parties and comprise the State Executive Committee Members and Heads of Ministries, Departments and Agencies.

r) Borrowing costs

Borrowing costs are capitalized against qualifying assets as part of property, plant and equipment.

Such borrowing costs are capitalized over the period during which the asset is being acquired or constructed and borrowings have been incurred. Capitalization ceases when construction of the asset is complete. Further borrowing costs are charged to the statement of financial performance.

s) Service concession arrangements

The State analyses all aspects of service concession arrangements that it enters into in determining the appropriate accounting treatment and disclosure requirements. In particular, where a private party contributes an asset to the arrangement, the State

recognizes that asset when, and only when, it controls or regulates the services the operator must provide together with the asset, to whom it must provide them, and at what price. In the case of assets other than 'whole-of-life' assets, it controls, through ownership, beneficial entitlement or otherwise – any significant residual interest in the asset at the end of the arrangement. Any assets so recognized are measured at their fair value. To the extent that an asset has been recognized, the State also recognizes a corresponding liability, adjusted by a cash consideration paid or received.

t) Budget information

The State was able to prepare accrual basis budget and all planned costs and income are presented in a single statement to determine the needs of the State. As a result of the adoption of the accrual basis for budgeting purposes, there would be no basis, timing or state differences that would require reconciliation between the actual comparable amounts and the amounts presented as a separate additional financial statement in the statement of comparison of budget and actual amounts.

u) Significant judgments and sources of estimation uncertainty

The preparation of the State's financial statements in conformity with IPSAS requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

Judgments

In the process of applying the State's accounting policies, management has made judgments, which have the most significant effect on the amounts recognized in the State financial statements.

Operating lease commitments – State as lessor

The State has entered into property leases of certain of its properties. The State has determined, based on an evaluation of the terms and conditions of the arrangements, (such as the lease term not constituting a substantial portion of the economic life of the commercial property) that it retains all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases.

Estimates and assumptions

In accordance with IPSAS 1 P. 140, the key assumptions concerning the future and other key sources of estimating uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The State based its assumptions and estimates on parameters available when the State financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the State. Such changes are reflected in the assumptions when they occur.

Useful lives and residual values

The useful lives and residual values of assets are assessed using the following indicators to inform potential future use and value from disposal:

• The condition of the asset based on the assessment of experts employed by the State

• The nature of the asset, its susceptibility and adaptability to changes in technology and processes

- The nature of the processes in which the asset is deployed
- Availability of funding to replace the asset
- Changes in the market in relation to the asset

Impairment of non-financial assets – cash-generating assets

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the assumptions may change, which may then impact management's estimations and require a material adjustment to the carrying value of tangible assets.

The State reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Cash-generating assets are stated at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates of expected future cash flows are prepared for each group of assets. Expected future cash flows used to determine the value in use of tangible assets are inherently uncertain and could materially change over time.

Impairment of non-financial assets – cash generating assets

The State reviews and tests the carrying value of non-cash-generating assets when events or changes in circumstances suggest that there may be a reduction in the future service potential that can reasonably be expected to be derived from the asset. Where indicators of possible impairment are present, the State undertakes impairment tests, which require the determination of the fair value of the asset and its recoverable service amount. The estimation of these inputs into the calculation relies on the use of estimates and assumptions. Any subsequent changes to the factors supporting these estimates and assumptions may have an impact on the reported carrying amount of the related asset.

Fair value estimation – financial instruments

Where the fair value of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, their fair value is determined using valuation techniques including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, judgment is required in establishing fair values. Judgment includes the consideration of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Provisions

Provisions were raised and management determined an estimate based on the information available.

Provisions are measured at the management's best estimate of the expenditure required to settle the obligation at the reporting date, and are discounted to present value where the effect is material.

Provision is made for the estimated cost to be incurred on the long-term environmental obligations, comprising expenditure on pollution control and closure over the estimated life of the landfill. The provision is based on the advice and judgment of qualified engineers.

The increase in the restoration provision due to passage of time is recognized as finance cost in the statement of financial performance.

The cost of ongoing programs to prevent and control pollution and rehabilitate the environment is recognized as an expense when incurred.

Held-to-maturity investments and loans and receivables

The State assesses its loans and receivables and its held-to-maturity investments at the end of each reporting period. In determining whether an impairment loss should be recorded in

surplus or deficit, the State evaluates the indicators present in the market to determine if those indicators are indicative of impairment in its loans and receivables or held-to-maturity investments.

Where specific impairments have not been identified the impairment for receivables, held- to-maturity investments and loans and receivables is calculated on a portfolio basis, basedon historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

	Total GOVERNMENT SHARE OF FAAC (STATUTORY REVENUE)	52,397,380,165.82	37,853,942,589.00	14,543,437,576.82	37,917,389,795.18					

Government's share of FAAC represents total statutory allocation to Kwara State Government for the period ended 31st December 2022 which is **N52,397,380,165.82**. Consequently, comparing Government Share of FAAC (Statutory Revenue) from Consolidated Statement of Financial Performance and Consolidated Statement of Cash flow gives a rather conflicting amount. Kwara State Government had a total FAAC allocation of **N52,397,380,165.82** for the period ended 31st December, 2022 but instead receives a total of **N37,267,112,807.79** (see Note 49a), this is as a result of the State's financial obligation with respect to loan repayment which is deducted from the FAAC allocations due the state each month. The difference is shown in the table below (Note 1A).

Exchange difference as reported by the state government is the difference resulting from translating a given number of units of one currency into another currency at different exchange rates. The Exchange difference realized for KWSG was recorded by applying the Spot exchange rate at the date of cash flow.

These are transactions in which Kwara State Government receives consideration from and gives approximately equal value in exchange for goods and services or use of asset.

Revenue from sale of goods and services is recognized when the significant risk and rewards of ownership of the goods are transferred to the buyer; the goods and services have been delivered when the revenue can be reliably measured and it is probable and it is probable that the economic value will flow to the Kwara State Government.

Interest is recognized on a time proportion basis that takes into account the effective yield on the asset; the amount of revenue can be measured reliably; and it is probable that the economic benefits or service potential associated with the transaction will flow to the Kwara State Government.

Revenue from the management of facilities, assets, or services is recognized over the term of the contract as the management services are provided; the amount of revenue can be measured reliably; and it is probable that the economic benefits or service potential associated with the transaction will flow to the State. Revenue from interest,

royalties and dividends of similar distribution shall be recognized as they are earned in accordance with the substance of the relevant agreement; the amount of revenue can be measured reliably; and it is probable that the economic benefits or service potential associated with the transaction will flow to the State.

Rental income from government buildings is recognized as earned in accordance with the terms of the tenancy agreement. This is in addition to its measurability and derivation of economic benefits.

The Kwara State Government will recognize a grant at the Point of receipt of grant or enforceable claim to receive it; that is, when the amount is pledged, and a memorandum of understanding is signed.

The Kwara State Government will recognize a grant at the point where future economic benefits or service potential flows to the stateand the fair value can be measured reliably; when the amount is pledged, memorandum of understanding signed.

Where aid/grant is received in form of assets, measurement will be based on the value attached to the Assets by the Donor or else the fair value of the Assets will be determined by the Kwara State Government, as at the date of acquisition.

Salaries & Wages are employee benefits which are establishment cost for direct and indirect employees, including political office holders. In Kwara State, all employee benefits are consolidated. Salary is a base amount from which other regular allowances are determined. Entertainment allowance is aimed at catering for work related entertainment of internal and external customers. Furniture allowance is meant to augment the cost of furnishing official residences of government appointees, customarily paid once in four years subject to approval. Hazard allowance is a special allowance paid to employees who work in hazardous environment, for example, hospitals, laboratories, fire services etc. Housing allowance is given to employees to augment rental charges for employees that do not enjoy government quarters. Leave allowance is paid to employees to defray cost of travelling to leave destinations. Legislative allowance is a special allowance paid to staff working with legislators. Meal allowance is meal subsidy paid to all employees. Medical allowance is aimed at subsidizing cost of medication and hospital services etc.

Pension and Gratuity are deferred benefit. Employees earn pensions throughout his career in the public sector but benefits will only start to be paid as pension upon occurrence of one of the pre-defined events such as retirement or death in service. A close look at the Social Benefits on Statement of Financial Performance (Note 13) and Consolidated Statement of Cash flow (Note 49i) the different is as a result of accrued gratuity incurred by the state but payment have not been completed within the period ended 31st December, 2022.

Overhead costs are operating expenses associated with running the states and can't be linked to creating services. These are the expenses incurred to stay in business, regardless of its success level. Also, the cost can directly be attributed to generating revenue. The financial statements are prepared on Accrual basis except for the statement of cash flow, this could lead to differences. Loan payments was technically included in overhead expenses for the awareness of these expenses, most especially because you are budgeting, managing your cash flow, and calculating your overhead rate.

Public debt charges are interest and other expenses incurred by Kwara State Government in connection with borrowing of funds for qualifying assets. Kwara State Government has adopted the benchmark treatment, under which public debt charges are recognized as expenses in the period which they occur regardless of how debts are applied. Public debt charges include - the interest on unmatured debt and on other accounts, the amortization of premiums and discounts on unmatured debt, the servicing costs and costs of issuing new borrowings and all other cost associated with obtaining the debt. A close look at the Public Debts Charges on Statement of Financial Performance (Note 22) and Finance Cost on Consolidated Statement of Cash flow (Note 49M) shows two different amount, it is as a result of non-cash repayment of state borrowings which are deducted at source from the state share of FAAC.

	Total Cash and Cash Equivalents	19,703,007,934.15	33,143,148,550.64

Cash includes cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant risk of changes in value. Investments normally only qualify as cash equivalent if they have a short maturity of three months or less from the date of acquisition. Financial instruments can only be included if they are in substance cash equivalents, eg debt investments with fixed redemption dates that are acquired within three months of their maturity.

	Total Receivables	8,170,000.00	8,170,000.00

Receivables are amounts due to Kwara State Government from personal for administrative advances paid for services performed in the ordinary course of business. They are generally due for settlement within 4 weeks and are therefore all classified as current. Receivables are recognised initially at the amount of consideration. The state holds the receivables with the objective of collecting the cash or a retirement from the personnel after the administrative expense has been incurred.

Presently, the State measures and recoginsed her asset at cost, this is responsible for the negative net asset in the statement of financial position. However the State is currently making efforts to establish fair value of all historical assets controlled by the state. Once this exercise is completed, a more detailed asset register and its associated accumulated depreciation as well as depreciation policy would be reported.

	KWARA STATE GOVERNMENT		
	Intangible Assets		
	35		
		2022 Financial Year	2021 Financial Year
		=N=	=N=
	INTANGIBLE ASSETS		
33010109	RESEARCH & DEVELOPMENT	51,984,025,337.49	22,434,324,521.18
	Total INTANGIBLE ASSETS	51,984,025,337.49	22,434,324,521.18
	Total Intangible Assets	51,984,025,337.49	22,434,324,521.18

Intangible assets are identifiable non-monetary Assets without physical substance. In other words, they are assets that can generate economic benefits but cannot be seen physically or felt and can either be purchased or internally generated.

Intangible assets under Kwara state is typically made up of Goodwill, Computer Software, Copyrights, Trade Marks, Acquired Import Quotas, Broadcast Rights, Patents and Research and Development (R&D).

Research costs are to be recognised as expenses when they are incurred, except in cases where in the research phase of an internal project, the state can demonstrate that an intangible asset exists that will generate probable future economic benefits or service potentials; while the development costs/phase are required to be recognised as an asset except otherwise assessed.
